## About Albany

Albany Windows has been installing quality home improvement products in properties in and around the Gloucestershire area for over 15 years. We offer PVCu and aluminium windows, doors and conservatories, composite doors and solid tile roofs, to improve the appearance and energy efficiency of your home.

We don't do gimmicks or discounts; you get a great price, first time, every time, and we're happy to take on any project you have, whatever the size.

There are six simple steps to having new windows installed by Albany, making it even easier for you to get the look you want for your home, for less:

1. Get in touch with us by calling FREE on 0800 111 4621
2. We'll arrange a visit to discuss your requirements and determine an accurate final price. Appointments rarely last more than an hour and we'll never pressure you into a sale

3. A formal quotation is posted to you within 48 hours of our visit. All you need to do is post back a copy of the order sheet / quotation and we'll call to arrange a detailed survey and get exact measurements
4. 2–4 weeks after the survey your windows are delivered to us and a fitting date will be set
5. We don't subcontract work to others; our fitters arrive around 8–9am on the first morning, taking care to cause minimal disruption to your day, and respecting your property
6. Payment is due on completion. We offer a choice of payment methods including all major credit cards and Barclay's home improvement loans. Your insurance will start from the moment payment has been made

We have lots of testimonials and installation images from happy customers, and we welcome you to visit our Gloucestershire showroom to see the quality of our products for yourself.

Which? Trusted Traders is a scheme which recognises reputable and trustworthy traders and assesses them to ensure you're getting quality products and services. As a member of this scheme you can be confident you're getting only the very best for your home when you choose Albany Windows.

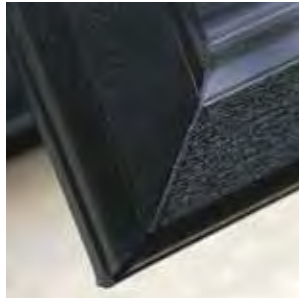

# AlbanyWindows

Improve the look of your home and its energy efficiency with our PVCu or aluminium windows. Replace old timber or aluminium windows, or upgrade your existing PVCu windows, and see the difference it can make to your property!

Our PVCu windows are very thermally efficient, keeping the heat in and the cold out of your home, to save you money on your heating bills. They're also easy to clean for a lasting, low-maintenance new look for your home.

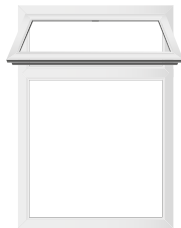

Choose new windows to replicate the old ones or go for something different. The most popular choice is casement but there are lots of styles for you to pick from, including arched head and circular shapes.

We offer white PVCu windows along with a selection of standard colours, but we can also install windows in any of the thousands of shades in the RAL colour range. If you like the look of wooden windows, our woodgrain finishes give the look of timber for less.

## **Albany**Vertical Sliders

Our PVCu vertical sliders have all the traditional charm of original timber vertical sliders, such as a deep bottom rail and Georgian bars. They also feature a 128mm front to back dimension, meaning they can replace original box sash windows, without the need for additional building work for the window to fit.

Unlike older timber windows however, our PVCu alternatives are incredibly low maintenance, with a tilt in facility to allow easy cleaning from the inside. Other modern details such as authentic look woodgrain finishes and excellent energy efficiency and weatherproofing make this style an attractive, classic addition to newer homes too.

*Stylish, secure and energy efficient PVCu doors, to brighten up the front of your home, open out onto a patio area, or lead into a conservatory.*

## AlbanyDoors

We offer PVCu and aluminium French and sliding patio doors that are energy efficient, secure and available in a wide range of colour options. These can be installed as part of a new conservatory or extension, or to replace a PVCu entrance door, to let more light into your home and give better views to the outside.

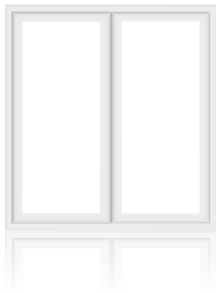

Our doors are designed to be energy efficient, so whether you're installing new or replacing existing doors, your home will stay cosy, warm and protected from the elements. They're also secure, with multipoint locking, protecting you and your home from any would-be intruders.

The classic French style looks great in older properties; but if space in your home is too limited for an outward opening door, the sliding patio style suits almost any type of property. Our doors are available in a choice of coloured and woodgrain finishes, as well as RAL colours, to complement your home's colour scheme.

Bifold

## Albany Bifolds

Bifolding doors are a modern alternative to traditional French and sliding patio styles, and are very popular with homeowners because of their ability to make a space look bigger and brighter. This style of door is very versatile; it can be installed as an entranceway onto a garden or balcony, as part of a conservatory, and even across a wall in an extension or garage conversion in place of windows.

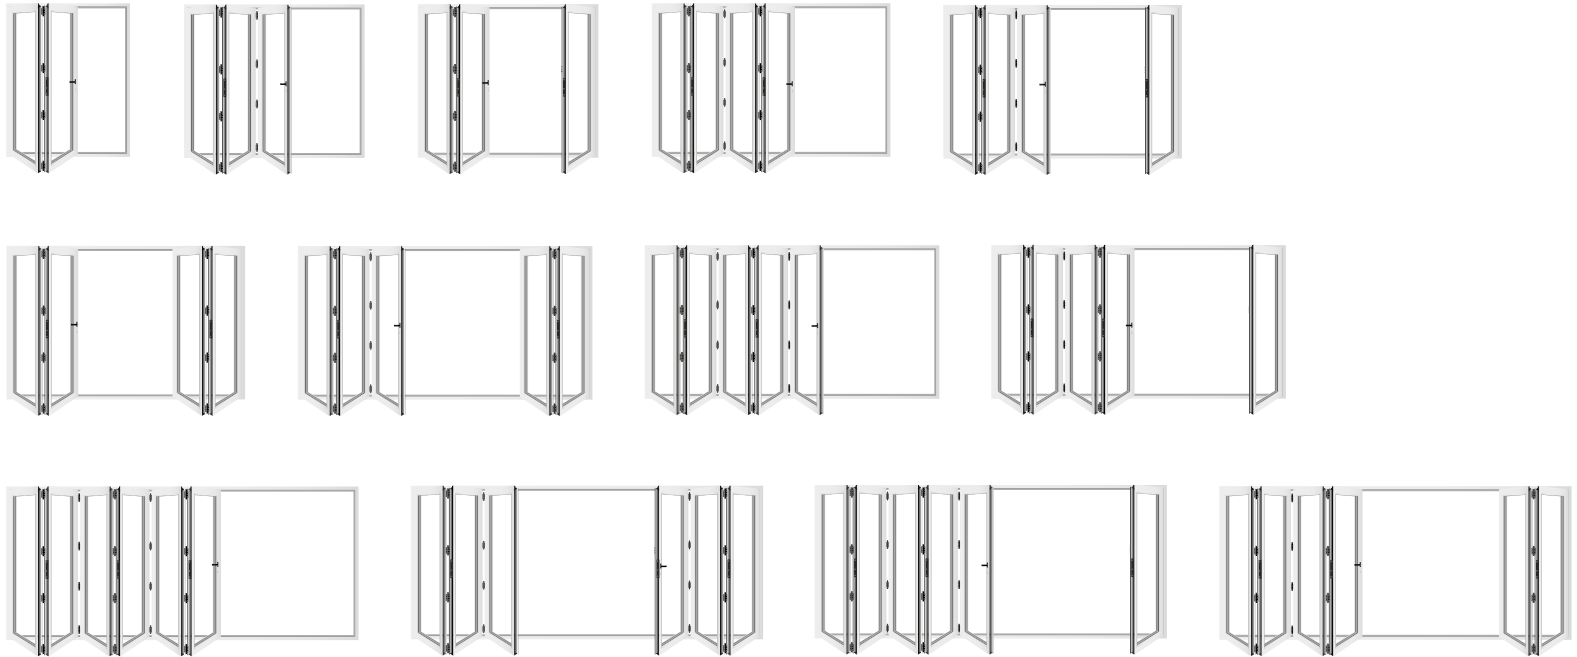

designed to be a secure and energy efficient addition. Open up a bifold in the summer to bring the outside in and create cool air flow when it's hot. In the winter, your bifold lets you enjoy great views to outside, whilst keeping your home warm and weatherproofed.

We install bifolding doors in a range of colours, including woodgrain effect foils, as well as in the RAL spectrum of colours.

## AlbanyComposites

Want a new look for your property? A new front door can refresh the look of your home, reduce draughts and heat loss, and increase security.

Composite doors are stronger and more energy efficient than PVCu front doors, and don't require as much maintenance as a timber door, making them an ideal replacement solution. Our composite doors feature a high density foam core that insulates your home against the cold and noise.

A GRP (Glass Reinforced Plastic) skin provides a

low-maintenance wood effect finish to your door, that is resistant to cracking, fading and warping under extremes of weather. Your home is also protected from any would be intruders, with a reinforced door frame and multi-point locking keeping your home safe and secure.

There are lots of different combinations of styles, colours and glass options to choose from in our range, and we guarantee you'll find just the right door to brighten up your home's entrance way.

## Albany Conservatories

A new conservatory is a great investment for your home; adding a new room which can be used for a variety of purposes. Whether you want to transform the space into another room such as a dining room or playroom, or simply want a quiet place to relax, we offer a wide range of conservatory styles to suit your needs.

Our PVCu or aluminium conservatory roofs use thermally efficient glass to keep your conservatory warmer in the winter, and this is tinted to stop solar glare and reflect heat in the summer too. Glass also reduces rainfall noise dramatically when compared to polycarbonate conservatory roofs.

To complement our range of quality windows and doors, our conservatories are available in standard colour foils, woodgrain effect foils and the RAL range of colours.

### Solid Tile Roof

If you already have a polycarbonate conservatory or an older glass roof conservatory, but rarely use

it because of it being too hot in the summer or too cold in the winter, the solid tile roof can help transform it into a year-round living space.

The solid tile roof is a solid tile conservatory roof which keeps your conservatory at a comfortable temperature in all seasons. We can install a brand new conservatory for you using the solid tile roof, or we can upgrade your existing conservatory so you can make the most of the extra room!

However, the latest glass roofs are also very thermally efficient in winter and cool in summer and provide far more light into the conservatory and to inner rooms. It all depends what is important to you, maximum light and open skies or a greater feeling of solidity and winter cosiness.

### Combination Roofs

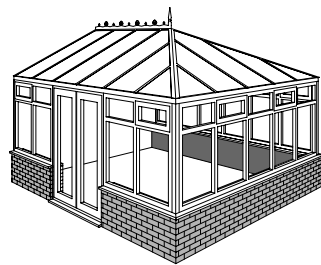

You can also combine glass and tiles to give a stunning loggia effect, or have a partially flat roof with a glass lantern for a superb orangery. These days your options are endless.

*Add another room to your home without having to move, with an Albany conservatory you can use all year round.*

## AlbanyRoofline

Roofline is often an overlooked part of a property, and is hard to maintain and clean. But leaving it unchecked and in disrepair is bad for your property, as leaks can damage brickwork and roof beams, compromising the structure of your home.

Our PVCu roofline products are extremely low-maintenance and built to withstand the harsh weather the outside of your home is exposed to. We install fascias and soffits, guttering, and cladding. Choose from bright white or pick from a range of additional

colours and wood effect finishes, for a fresh new look for your home that's easy to keep looking that way!

If you have old, damaged timber roofline, upgrade to our PVCu roofline today and see the difference it can make to your home's appearance. No more leaks or draughts, only a low-maintenance finish which provides protection against the elements.

### ColourOptions

Our PVCu windows, doors and conservatory roofs are white as standard, but we also offer home improvement products which use woodgrain foils to give you the look of timber without the timber price tag.

If you fancy something different, the RAL range of colours has something for everyone. Pick from soft pastel shades right through to eye-catching bright colours and statement shades such as black.

## Hardware Options

The hardware used on our PVCu and aluminium windows, doors and composite doors is of the highest quality, meeting excellent standards in security and standing the test of time.

Choose from different styles of handle and accessories, in a variety of colours, to complement your choice of window or door.

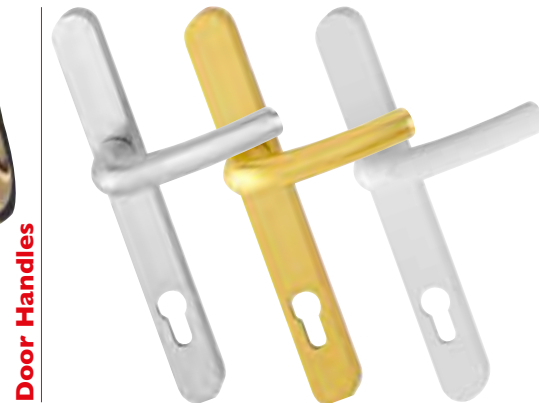

Window Handles

Offset Handles

Inline Tilt 'n' Turn

Our window handles are available in: White, Hardex Chrome, Hardex Satin, Hardex Bronze, Hardex Smoke, Hardex Gold & Black

Door Handles

Our door handles are available in: Satin Chrome, Gold, Polished Brass, White & Black

Door Hinges

All of our door hinges are available in: Black, Hardex Black, Hardex Chrome, Hardex Gold, Hardex Silver, Satin, Silver & White

## Energy Efficiency & Glass Options

Installing energy efficient windows in your home provides many benefits, such as:

- **A warmer home in the winter**
- **Lower fuel consumption / Lower heating bills**
- **Reduced condensation inside the home**
- **Less likely to experience problems such as damp, mould and draughts**

You can see how energy efficient a window is by its energy rating. This is on a scale G – A+, with A+ being the most energy efficient. Our PVCu and thermal aluminium windows are rated A or A+, meaning they are very energy efficient.

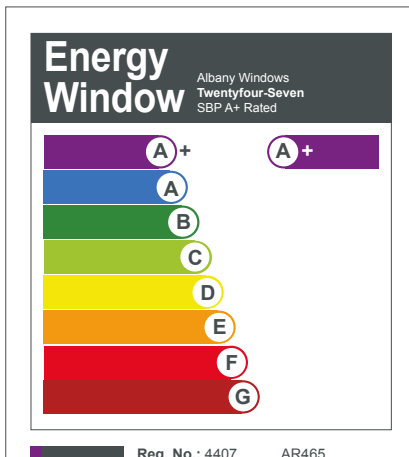

### Glass Options

Our windows use Planitherm Total+ low emissivity glass. In winter this glass reflects heat from radiators and fires back into your room, but in summer goes into reverse and reflects heat back out.

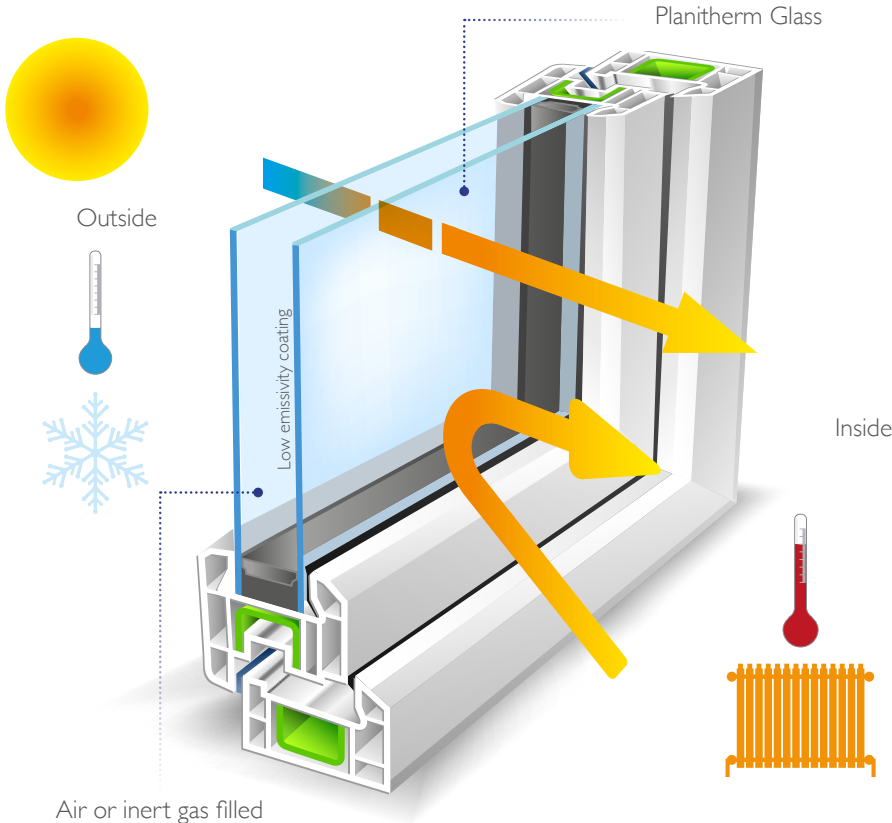

For windows in rooms requiring privacy, we offer obscure glass patterns that maintain privacy and still let light into your home. We also offer decorative glass options, including coloured and leaded glass options.

#### Triple Glazing

44mm triple glazing is also available with two panes of Planitherm Total+ and two argon gas filled cavities.

# Double glazed unit with PLANITHERM

## Why you should have Planitherm Glass installed in your windows

- 

Free Solar Gain
- 

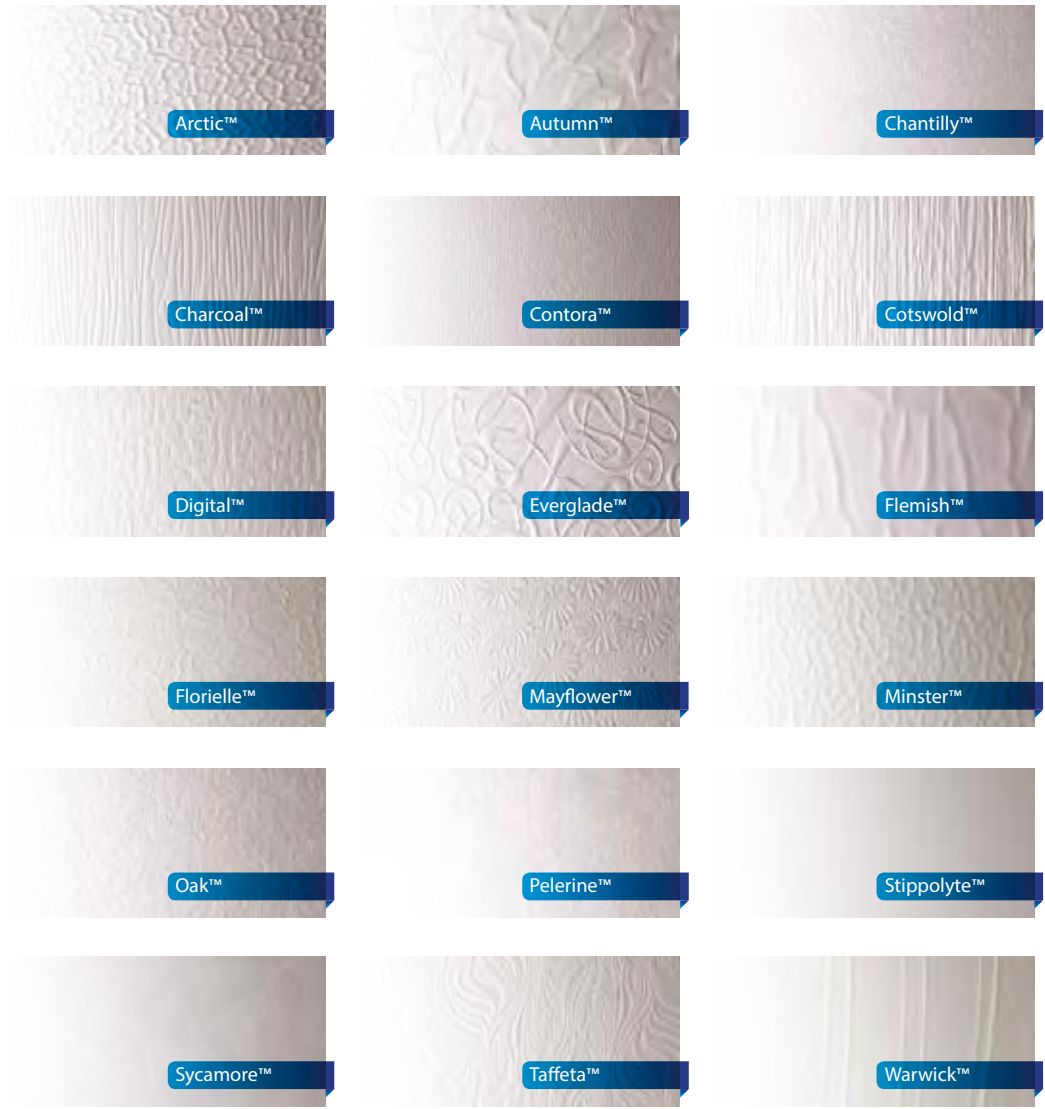

Thermal Insulation
- 

Optimal Inside Temperature
- 

Haze & Tint Free Glass
- 

Reduces Condensation

## **Albany**Security

Keeping your home safe is important, which is why our products are manufactured with security in mind. Our PVCu and aluminium windows meet some of the highest security standards in the industry today to give you peace of mind.

Our doors are manufactured with high performance, multi-point locking mechanisms as standard, to keep your home protected and stop potential intruders in their tracks.

*Your home's security should never be compromised; Albany products are designed to keep potential intruders at bay.*
